Internal Medicine Hospitalist Service Acute Complex Care Team (ACCT) St. Paul's Hospital

Providence Health Care is seeking qualified Internal Medicine specialists to work in an innovative new care team at St. Paul's Hospital (SPH). The IM physician will serve as the MRP for the team comprised of two IM physicians Monday – Friday, a Nurse Practitioner, and other allied to care for 25 patients with flex to 30 patients.

The IM physicians will work in two shifts weekdays, providing on-site care from 0800h to 2200h daily weekdays and a single physician 0800-1600h on weekends. The service will operate 7 days/week, requiring the IM physicians to commit to working on either Saturday or Sunday when they are on service for the week. The service will have an innovative co-management model with the NP and other specialty services to address the complex needs of our patients. This is a non-teaching service reasonably there may be interaction with Residents and Fellows from other services.

Typical patients on this service are acutely ill and socially complex, with admissions typical of IM and hospitalists services such as pneumonia, cellulitis, infective endocarditis, osteomyelitis, heart failure, +/- addictions.

The service is starting January 21, 2019 and is compensated under an alternate payment agreement.
