

PHC Facility Engagement Final Report

Project No./ Project Name	PHC-0069 – “Social Noon Round”
Project Results	Record number of SPH MDs attended the social noon round. There is also record number of diversity in terms of MDs from different departments and division. The attendance ranges from 11 to 18 people. One of the events had MDs from 7 different divisions attend. The frequency of social noon round was increased (and well received) around the time of CST launch. I received request from the 4-physician advisory committee to use social noon round as a way to promote the respective committees and pillars. Social noon round inspired the development of a similar event at MSJ Scrub Grub Club, every second Wednesday.
Unexpected Outcomes	<p>We have surveyed the MDs who attended social noon rounds and there was some the unexpected feedback.</p> <ol style="list-style-type: none"> 1) More veggie and gluten free food options 2) More “activities” in addition to eating. Board games in the lounge was suggested 3) In addition to monthly email reminders, some would like a calendar invite with the email. 4) Over budget. This is because MDs requested more frequent events especially around time of CST launch
Lessons Learned	<p>From the surveys, I learned that MDs value the opportunity to decompress and meet MDs from other department/divisions face to face.</p> <p>Please click here for surveys</p>
Recommendations for improvement (to inform future projects and strategic decision-making)	Persistent and consistency are both very important. Social noon round started more than a year ago the momentum is keeping up because it is reliable. For some MDs it is now part of their routine to come out every Friday of the month.
