Indigenous Wellness

PHC is committed to integrated services for patients, residents and families with indigenous heritage and services characterized by Cultural Safety and Humility. These services are managed through the office of Urban Health under the Director of Strategy & Transformation, Urban Health, Indigenous Health, Mental Health and Substance Use. The executive sponsor for this portfolio is the Vice President of Mission, Ethics, Spirituality and Indigenous Wellness.

The PHC Indigenous Health team helps patients, residents and families with access to cultural support, cultural teachings, traditional medicines, community services and connection to ceremony. The Indigenous Health Team also leads a regular weekly Talking Circle in the All Nations Sacred Space in the hospital, and helps provide cultural safety and humility education for staff.
