

Expression of Interest **Anatomical Pathologist**

Position Summary

Within the context of a patient and family-centered model of care, and in accordance with the Mission, Vision, Values and strategic directions of Providence Health Care ("Providence"), the Pathology and Laboratory Medicine is seeking Anatomical Pathologists at [SPH/MSJ/PHC].

The candidates will join a group of 17 anatomical pathologists based at St. Paul's Hospital, a 455-bed tertiary academic hospital located in downtown Vancouver, B.C. It is the largest facility within Providence Health Care and one of the two major teaching hospitals in Vancouver Coastal Health Authority. The hospital has major programs in breast surgery, gastroenterology, colorectal surgery, cardiology, cardiac and vascular surgery, nephrology, endocrinology, and HIV/AIDS. Our laboratory also includes divisions of medical microbiology, clinical chemistry, and hematopathology/transfusion medicine.

The laboratory provides an opportunity to work in multiple areas of anatomical pathology including general surgical pathology, intraoperative consultations, non-gynecological cytopathology, and autopsy pathology. The practice is a broadly based anatomical pathology service and a wide-range of knowledge and proficiency is required. Subspecialty expertise currently exists in breast pathology, gastrointestinal/liver pathology, cytopathology, dermatopathology, genitourinary, renal pathology, thoracic, and cardiovascular pathology.

Providence Health Care and the University of British Columbia hire on the basis of merit and are committed to employment equity. We encourage all qualified persons to apply; however, Canadians and permanent residents of Canada will be given priority.

Qualifications

Applicants must either hold or be eligible for certification by the Royal College of Physicians & Surgeons of Canada in anatomical pathology or general pathology. Preference will be given to candidates with fellowship training in breast, gynecological, or genitourinary pathology, or demonstrated significant experience at a major tertiary medical centre in those subspecialty areas. Candidates must be eligible for licensure in British Columbia.

Teaching of medical students and residents is an integral component of this position and preference will be given to applicants who can provide evidence of current involvement and commitment to education. A strong record of research experience will be considered an asset. The successful candidate will be a member of the University of British Columbia clinical faculty; academic rank will be determined in accordance with their previous academic record.

The successful candidate will also exemplify Providence's values and contribute to a culture of equity, diversity, and inclusion. In addition, Providence is committed to our responsibilities on Truth and Reconciliation. We hold

ourselves accountable for making our care, facilities and services a safer experience for Indigenous patients, residents, families, staff and Medical Staff.

Why PHC

Providence is a non-profit Catholic organization that provides services in partnership with Vancouver Coastal Health and the Provincial Health Services Authority. At Providence we embrace compassionate care, social justice, and innovation while delivering medical services to vulnerable populations across Vancouver and its neighbouring communities. Providence is committed to building a culture of equity, diversity, and inclusion where the staff and Medical Staff – both current and prospective – feel welcomed, valued, and supported to thrive in their work. As we look towards the future, we are led by four strategic pillars: quality-forward, people-forward, learning-forward, and partnerships-forward. We invite you to join us as we work towards building the future of healthcare in British Columbia.

How to Apply

To build a strong and representative workforce, we encourage physicians from all backgrounds to apply. We are deeply committed to diversity within our community, and welcome applications from Indigenous persons, people of colour, persons with disabilities, persons of any sexual orientation or gender identity, and others who may contribute to the further diversification and inclusion of ideas, practices, and ways of knowing that can improve our care and services.
